encryption, secure APIs, and access controls to prevent unauthorized access and data breaches, ensuring compliance with industry standards and regulations.

Encryption

Tagline: **"Encrypt Everything. Trust Nothing Unsecured."**

Our IoT encryption services safeguard sensitive data using advanced cryptographic techniques. Whether it's device-to-cloud communication or local data storage, Alykas ensures confidentiality and integrity through robust encryption protocols tailored to your specific use case and risk profile.

Micro-Segmentation

Tagline: **"Divide and Defend—One Segment at a Time."**

Alykas uses micro-segmentation to isolate IoT devices and networks, limiting the spread of threats and enhancing control. By creating secure zones within your infrastructure, we minimize attack surfaces and ensure that even if one device is compromised, the rest of your environment remains protected.

Teams Calling as a Service

Tagline: **"Dial into the Future—One Click, One Cloud, One Call**."

Alykas offers Microsoft Teams Calling as a Service to modernize your voice communication. We enable cloud-based calling with enterprise-grade reliability, seamless integration with Microsoft 365, and global PSTN connectivity—eliminating the need for traditional phone systems. Our
